

Victus Group Sustainability Report 2025

Threads of Responsibility Shades of Sustainability

At Victus Dyeings, we believe that true progress is achieved when innovation and responsibility go hand in hand. Sustainability is not an afterthought for us; it is part of the fabric of everything we do. From the way we manage resources to the way we collaborate with partners, our choices are guided by care for the environment and commitment to a better future. We have embraced cleaner energy, reimagined our processes to minimize waste, and invested in technologies that give back more than they take. By recovering and reusing valuable resources, we ensure that our operations respect natural limits while continuing to deliver quality. Our journey is strengthened by global standards and certifications that reflect accountability and transparency. This year's theme, Threads of Responsibility, Shades of Sustainability, reflects our vision of knitting progress with purpose. Each effort is a stitch in a larger fabric – one that is innovative, ethical, and enduring.

Steps that Matter

Living Our Sustainability Values

Complete Coal Phased Out

Increased Renewable Electricity

Energy Efficiency Projects

Zero Liquid Discharge

15079.66 MW
Renewable Electricity

10576.66 tCO₂e
Scope 1&2 Emissions

91
Verified Ave. Score

2279.66 KL
Storm Water

560095.11 KL
Recycled Water

98.75%
Waste Recycled

Emissions Management

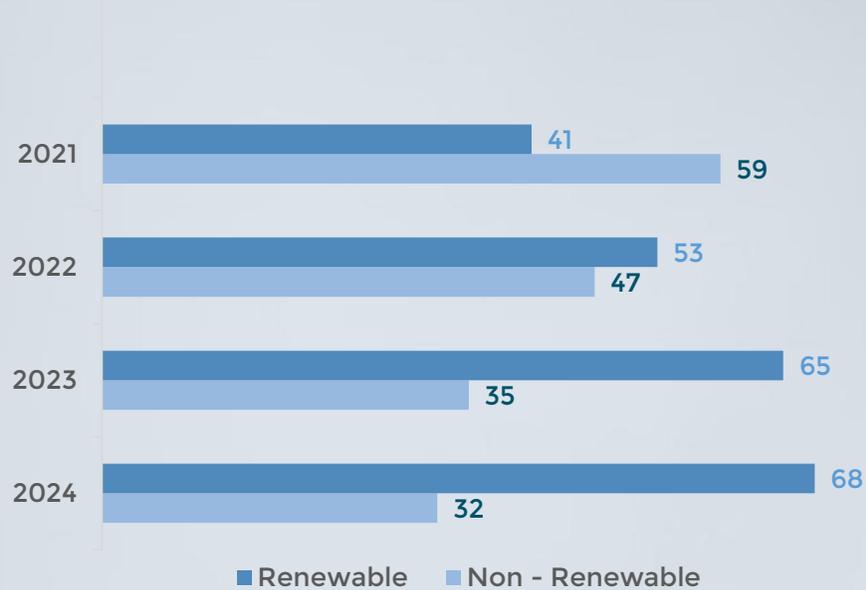

At Victus Dyeings, we recognize the significant role our industry plays in global emissions and the responsibility to act decisively. The fashion supply chain - from raw material sourcing and production to distribution - carries a considerable carbon footprint, and we are committed to reducing it at every step.

Our approach focuses on shifting towards cleaner energy, enhancing operational efficiency, and partnering with partners who uphold the same environmental commitments. We have also strengthened our data systems by using technology partners, to track and analyze emissions more effectively across Scope 1, 2, and 3, enabling transparent reporting and better-informed decision-making.

“We, recognize that this shift is not just a business decision - it’s a moral imperative”

TREND ANALYSIS

Renewable Electricity Trend

16 MV

Capacity of Offsite Solar and Wind Mills are Installed to achieve our present status.

Scope 1 & 2 Emissions

Scope wise emission (tCO₂e):

86% Emissions Reduced From 2021 to 2024

2030

Target to achieve:
90% Renewable electricity goal

2030

Near-term Target:
63% Emissions Reductions

Effluent Management

- 2800 KLD Capacity of ZLD Plant
- 98.6 % of Effluent is treated
- 95 % of Salt is Recovered

Waste Management & Circular Economy

- We follow a systematic waste management approach aligned with our sustainability goals.
- All fabric waste is recycled, ETP sludge is sent to cement industries and both hazardous and non-hazardous wastes go to certified recyclers.
- A digital tracking system ensures transparency from generation to final disposal.

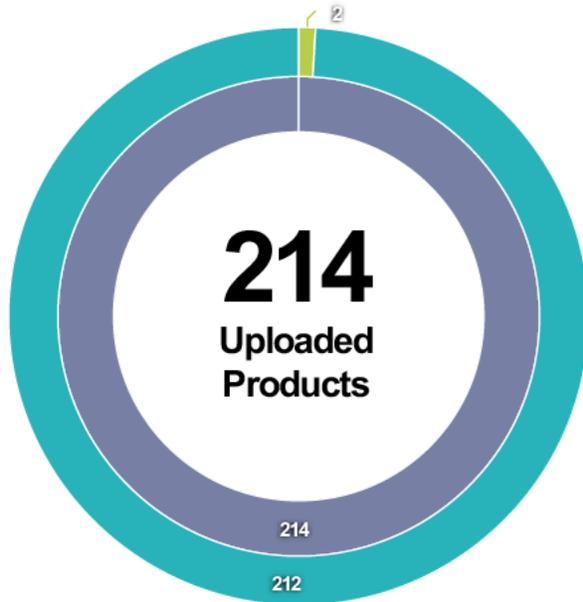

Chemical Inventory Performance

Total amount of chemical inventory products: 214

% of products published in Gateway: 100.00%

% of ZDHC MRSL v3.1 Levels 1, 2, 3: 100.00%

Evaluation	ZDHC MRSL v3.1
Level 1	2 products (0.93%)
Level 2	0 products (0%)
Level 3	212 products (99.07%)
Expired	0 products (0%)
Not Published in ZDHC Gateway	0 products (0%)
Conformant	214 products (100.00%)
Not Evaluated	0 products (0%)
All Products	214 products (100.00%)

Responsible Chemical Management

At Victus Dyeings, we prioritize responsible chemical management to minimize environmental impact.

Key highlights include:

- **ZDHC Compliance:** 100% of our chemicals are ZDHC-approved and comply with MRSL and brand RSL standards.
- **Traceability:** We ensure full traceability of chemicals, linking final product invoices to chemical lot numbers.
- **Digital Inventory:** We've adopted a digital chemical inventory system through the **BHive tool**, enhancing transparency and efficiency in our chemical management practices.

Recognition and Community initiatives

The journey continuous
